

# BRUER

The Cold Bruer is a simple and transparent way to make a smooth and naturally sweet cold brew at home.

## You Will Need:

- 1x Bruer Cold Drip Brewing System
- 1x Ice
- 1x Paper filter
- Coffee ground medium-coarse (#8 EK43)

## Coffee-to-Water ratio:

- 60 grams of coffee to every 700 grams of water and ice (half/half)

## Instructions:

1. When assembling the filter make sure the finer side of the mesh is facing up. Pop the glass tower into the filter.
2. Pour the measured ground coffee into the tower, brush any loose grounds down into the chamber. Shake the Tower to level out the coffee bed.
3. Carefully place the Tower into the Carafe. Drop a Paper Filter on top of the coffee bed.
4. Pre-wet the coffee with about two fl.ounces of water to evenly soak the grounds.
5. Carefully push the plug down into the tower. Wet the lip of the seal to help it slide in easily.
6. Measure out 700ml of an ice and water mixture (about half water and half ice). Pour the mixture into the tower.
7. Enjoy.

**PREPARATION: 2 MIN.**

**BREWING: 3 MIN.**

**READY IN: 5 MIN.**
