

TRINITY

The Trinity ONE is a specialty coffee brewing revolution. Brew your favourite pour over, press and cold brew, all in ONE.

You Will Need:

- 1x Trinity ONE
- 1x AeroPress filter or stainless steel disk
- Brewer Position: Gravity Press
- Water heated to 92° - 96°C
- Coffee ground medium-coarse (#7.5 EK43)

Coffee-to-Water ratio:

- 17 grams of coffee to every 250g of water

PREPARATION: 2 MIN.

BREWING: 3 MIN.

READY IN: 5 MIN.

Instructions:

1. Insert Filter into Filter Housing (use AeroPress paper or stainless steel disk).
2. Lock Filter Housing onto Brew Chamber and turn Flow Controller 'off'.
3. Add 17g (dosing tool 2/3 full) of fresh, filter coffee, ground to 'medium-fine' coarseness.
4. Add 250g (or just below fill line) of filtered water, heated to 92-96°C or 200-205°F. Immerse for ~45 seconds.
5. Press, by clipping the Press Cap onto Press Cylinder, turning Flow Controller 'on', and then inserting the Press Cylinder. Hold cylinder until Press Cap is in Brew Chamber, then release and let gravity do the rest! Once coffee is pressed through, turn Flow Controller off, remove cup or server and enjoy!
6. Clean by removing Filter Housing with right hand and guiding Press Cylinder to rest with left hand. Hit grounds into compost or sink, wash clean, and dry Filter Housing and Press Cap for next use.
7. When not in use, lock Filter Housing back onto Brew Chamber and stow on the bench.
